

# HYBR: Hybrid Cloud Management Platform

## Overview

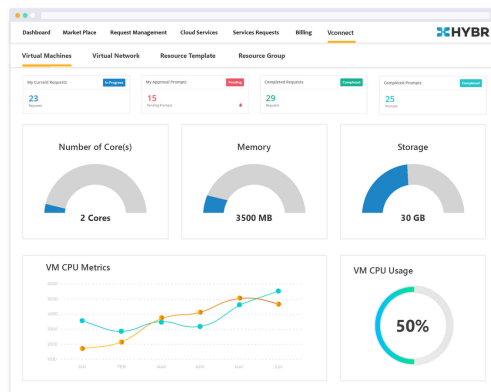

Hybr® is a white-labeled multi-tenant self-service platform that helps Enterprises, Cloud & Managed Service providers with first-class integrations to the data center, public, and private/hybrid cloud platforms for rich management, automation, and reseller billing experience. The solution offers workload life cycle management, cost management and a centralized marketplace experience that helps software license providers, resellers and distributors sell various catalogs of solutions and services across hybrid cloud.
